

Clamp Attachment - Drums Manual or Geared Rotation

Drum Clamp Attachment

Used for gripping loads by the diameter or circumference such as drums and barrels etc and rotating to any position through 360° deg.

For applications outside of the standard range the company provides a full bespoke design service offering solutions for most applications.

Packline's range of attachments are fully interchangeable and can be easily fixed or removed from any model of Compac fitted with the unique quick release system.

Overview:-

- Loads capacity up to 300kg - depending of lifter capacity
- Fitted with rubber pads to provide maximum grip and assist alignment
- Suitable for load diameters of up to 850mm as standard
- Built in Slip Torque mechanism to ensure correct gripping pressure is applied preventing over tightening and damage to load
- Constructed mainly from anodized aluminium, stainless steel, brass and acetal
